Welcome to the
2014–2020 Alpine Space programme!

CO.N.S.E.N.SO

- ➔ care model that maximizes the effect of the human relationship between older people and a named professional for 300-500 +65 citizens
- ➔ personalized health and social services for the elderly and their families, particularly those living in isolated areas.
- ➔ FCNs: evaluate risk factors, manage minor health and social needs, promote healthier lifestyles, **assess pre-frail and frail conditions**
- ➔ Find with persons, families, communities and professionals appropriate solutions

PIEMONTE REGION IS REFERENCE SITE FOR THE ADVANCED TRAINING IN FAMILY AND COMMUNITY NURSING

Target 15.
An
integrated
health sector

...primary care..at the core
should be a well trained family
health nurse

Target 18.
Developing
human
resources
for health

Educational programmes
based
on health for all policy

The model aims to allow the elderly **to live at home as long as possible**: through periodical visits the FCN will evaluate their risk factors, manage minor health and social needs and promote healthier lifestyles.

Project objectives

- a) **improved access to services for ageing citizens** by validating an innovative model based on FCN
 - b) **a new governance to deliver healthcare and prevention**, reducing health expenditure by cutting hospitalisation costs
 - c) **powering-up a social market economy approach** with trained professionals in the forefront.
- Transnational and multilevel governance know how needed to achieve these results will raise the capacity of PAs and social sector to “re-invent” themselves and deliver innovation in services*

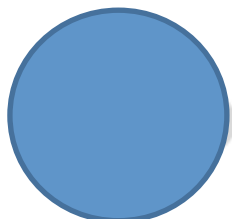

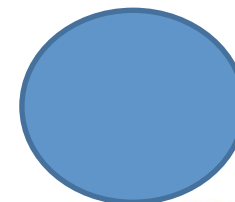

Core outputs

1

Training model CO1 – M26 (Joint transnational training models, contents and tools. Fine tuned, flexible, multilingual e-learning tools to be adopted after the project throughout the cooperation area)

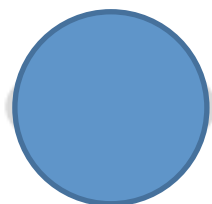

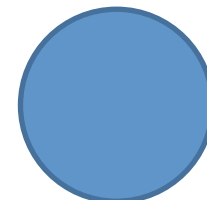

Model of care for elderly CO2 – M28 (Model of care for elderly based on FCNs, to be adopted in each testing, capitalising results produced during the test and assessed through a population-based trial)

2

3

Social Business Model CO3 – M30 (Starting from recent approaches [e.g. the Social Business Model Canvas ®] FCNs will be also involved in the journey of investigating and testing on the field a better tuned Social Business Model to guide social enterprise start-ups in the field)

Policy Guidelines and Toolkit CO4 – M33 (Starting from the models for training/FCN validation/social business as toolkit, the output develops sound Policy guidelines in the context of a transnational governance model for community based socio-health services for elderly citizens)

establishing trans-disciplinary professionalism by building health workforce capacity through community-based education (Global Forum on Innovation in Health Professional Education, 2012).

Currently, there is not much evidence on the impact of health professional education on innovation in health care. Probably, more integrated structures of health professional education and service delivery are needed in order to obtain such an impact (EXPH 2015).

SUNFRAIL will inform CO.N.S.E.N.SO and
CO.N.S.E.N.SO will test SUNFRAIL
